EDEN Data Groups

EDEN Data Groups

The term “EDEN Data Group” is a specific aggregation (i.e. group) of related data that is stored in EDEN to satisfy the specific information need of one or more ED program offices. Thus, an EDEN Data Group does not represent a single data entry but rather a set of related data entries. Each EDEN Data Group is intended to be discrete, concise, universally understood, and non-redundant. For example, one EDEN Data Group is mailing address. Mailing address includes several Data Groups: street address, city, state, zip code, and zip code plus 4.

EDEN Data Groups are defined based upon an analysis of information needs of ED and availability of data from the States. EDEN Data Groups define the data to be collected. The data collected by EDEN is approved through the Paperwork Clearance Process. No individual student or staff level data are collected.

The EDEN Data Groups to be collected through EDEN have been organized in this document as follows:

- **Directory Data Groups** – Directory Data Groups contain data about education units that does not change frequently. EDEN will maintain a three-tier directory of the education entities in each of the 50 states, the District of Columbia and Puerto Rico. The three-tiers are the State Education Agencies (SEAs), the Local Educational Agencies (LEAs), and the Schools. For each education entity in the directory, EDEN will maintain unique identifiers (e.g. name), contact information (e.g. mailing address), and descriptive information (e.g. type of education entity). Directory Data Groups need to be submitted only when they change.
- **Education Unit Data Groups** – Education Unit Data Groups are data about the education units that can change each school year, for example, whether a school made Annual Yearly Progress (AYP) or not. Education Unit Data Groups are submitted for each school year.
- **Program Data Groups** – Program Data Groups are data specific to the implementation of Federal Programs, for example, average length of neglected or delinquent program services.
- **Staff Data Groups** – Staff Data Groups are data about the Staff in the Schools and LEAs, for example, the number of special education paraprofessionals who are certified.
- **Student Groups Data Groups** – Student Data Groups are data about Groups of Students, for example, student membership by gender and race/ethnicity.

Because EDEN does not collect individual student or staff data, State Education Agencies will aggregate the data. These aggregations are referred to as categories and are described after the description of the EDEN Data Groups.

The final section of this attachment describes data that is to be collected from some but not all education units as part of surveys for civil rights and the charter schools program.

Directory

A Directory Data Group defines information about a specific education unit including its unique identifiers (*e.g.*, name, identification numbers, location), contact information (*e.g.*, addresses, phone numbers, websites), and descriptive information (*e.g.*, type, operational status). The identification numbers are used to link the education units to each other in the hierarchy. For example, the record for a school includes the identification number of the Local Education Agency that the school belongs to. Since Directory data generally stays the same year after year, Directory Data Groups do not need to be reported every school year. Instead, changes are reported based on the effective date of the change.

Data in the Directory will generally be obtained from SEAs. However, ED will be exploring the possibilities of obtaining locale code, Congressional District Number, County Name, Geographic Location, and DUNS Number from the other Federal sources instead of SEAs.

The first page of this section contains a summary of the directory data groups by the tier in the education hierarchy. The next part of this section contains the definitions and codes sets of the directory data groups. The data groups are listed alphabetically. The final part of this section contains detailed descriptions for the code sets for the directory data groups when the code sets are not self-explanatory.

Detailed description of code sets

Code Set Description for Education Agency Type (#453)

- LEA - Regular local school district that is NOT a component of a supervisory union: Includes both independent school districts and those that are a dependent segment of a local government, such as a city or county. Agencies that do not operate schools (non-ops) but have primary responsibility to provide free public elementary and/or secondary education to school-age children within their jurisdictions should be included.
- LEASU - Local school district that is a component of a supervisory union: A superintendent and administrative services are shared with other local school districts. Each agency given this code should have an entry in the Supervisory Union Identification Number data field corresponding to the appropriate type 2 or type 3 agency. Non-ops in supervisory unions should be included in this category.
- SU - Supervisory union administrative center, (or county superintendent's office serving the same purpose): Each agency given this code should have an entry in the Supervisory Union Identification Number data field. Student and staff data reported elsewhere should NOT be duplicated in records carrying this code.
- RESA - Regional education service agency (RESA): Agencies created for the purposes of providing specialized educational services to other education agencies. Student and staff data reported elsewhere should NOT be duplicated in records carrying this code.
- STATAGEN - State agency providing elementary and/or secondary level instruction: To school-age children in a specified population, e.g., agency responsible for state schools for the blind or deaf students, correctional facilities, and state hospitals.
- FEDAGEN - Federal agency providing elementary and/or secondary level instruction: To school-age children in a specified population. EXCLUDE Bureau of Indian Affairs (BIA) and Department of Defense (DOD) agencies.
- CHARSCH - Charter school agencies: Charter schools that serve as their own local education agencies within the state.
- OEA – Other education agencies: That do not fit into the first six categories.

Education Unit

EDEN will collect data about the education units that can change each school year, for example, whether a school made Annual Yearly Progress (AYP) or not.
